

PARTNER PROFILE

Who we are

PILO is a not-for-profit established in 2013 to work within education departments to improve learning outcomes at scale. It is partnering the KwaZulu-Natal Department of Education (with the NECT) and the Free State Department Education (with Old Mutual and the Kagiso Shanduka Trust).

Our contribution in supporting Woza Matrics

PILO, as part of the NECT, has worked with the DBE to conceptualise Woza Matrics and to assist its operationalisation. It has played a key role in the content selection process, and in supporting the research and communications work. The work of content selection has been generously supported by Yellowwoods, SATRIX and others.

Why we support Woza Matrics

COVID-19 has exacerbated the inequalities that will impact on the performance of learners in the Matric class of 2020. The free-to-air broadcast of quality learning material to support the last months of preparation for all learners is a necessary intervention. It can reach every

household with a Grade 12 learner and will strengthen all the efforts being made by learners, their schools and their families.

Quote

Woza Matrics is a national campaign expressing care and practical support to the class of 2020 which more than any other year before, needs this. Learners must feel they have had a fair chance to learn before they write the Matric.
